

We can use the `<nav>` tag to create a navigation bar.  
This will act as our header for the page and will allow us to display the navigation links to each page!

key elements inside `<nav>`: nav-title, nav-links

key CSS properties:  
`display: flex;` - to contain the title and links  
`position: fixed;` - bar will stay on top even when scrolling  
`flex-direction: row;`

`<- justify-content: space-between ->`

Use "hover" to darken the background to let user know they can select the page

See navbar notes above!

nav-links

Welcome to our cafe!

Bagel Gourmet has proudly served great food and bagels for over 25 years!

We love to see the joyful faces on our customers as they enjoy our renowned Providence style bagels!  
It's the reason why we stick to the old school procedure that begins every day at 2:30am...  
Our dough is made fresh daily so we never NEVER NEVER.... use bagels from a day before. It's a guarantee! :)

Food Gallery

Locations and Hours

loc

Richmond

222 Richmond St.  
Providence, RI 02905

Hours:  
Monday - Friday: 7 AM - 3 PM  
Closed on Saturday and Sunday

loc

Meeting

205 Meeting St.  
Providence, RI 02906

Hours:  
Open Daily: 7 AM - 3 PM

loc

Thayer

288 Thayer St.  
Providence, RI 02906

Hours:  
Open Daily: 7 AM - 3 PM

Every loc, each made up of an image and text, can be organized inside of a div:

`display: flex;`  
`flex-direction: row;`

Each loc can be its own flexbox that maintains a vertical display between image and text:

`display: flex;`  
`flex-direction: column;`

See notes below!

social-media

`<- justify-content: space-between ->`

The Best Bagels in Rhode Island!

footer-text

Similar to the navbar above, we have a footer div that remains fixed to the screen.

key elements inside `<div>`: social-media, footer-text

key CSS properties:  
`display: flex;`  
`flex-direction: row;`  
`position: fixed;`

social-media is itself a small flexbox that organizes three images horizontally

When the screen size becomes that of a tablet, the nav-links from before are hidden. In its place, we have a custom icon that will appear in the top right corner of the screen.

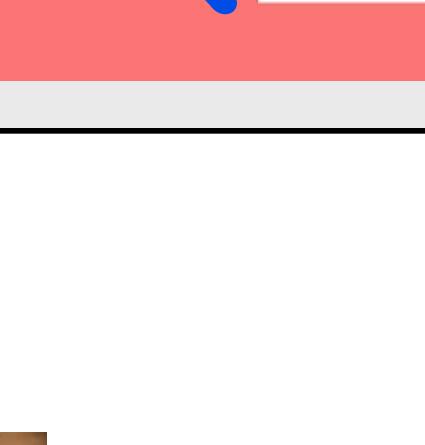

To have this switch occur, we will need to define properties after the screen is minimized to a specific dimensions via @media.

Inside @media:

dropdown icon:  
display: flex;

nav-links:  
display: none;  
flex-direction: column;  
text-align: center;

## Bagel Gourmet Cafe

### Welcome to our cafe!

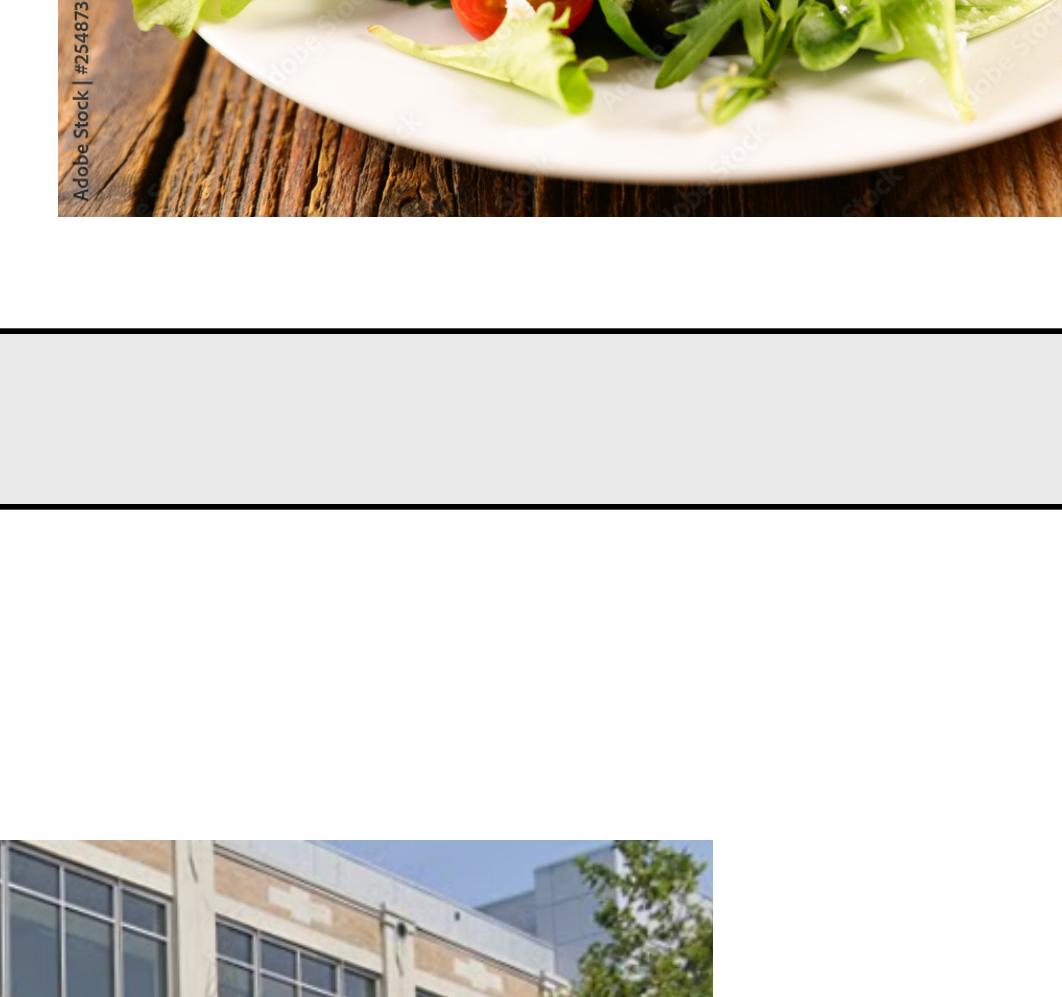

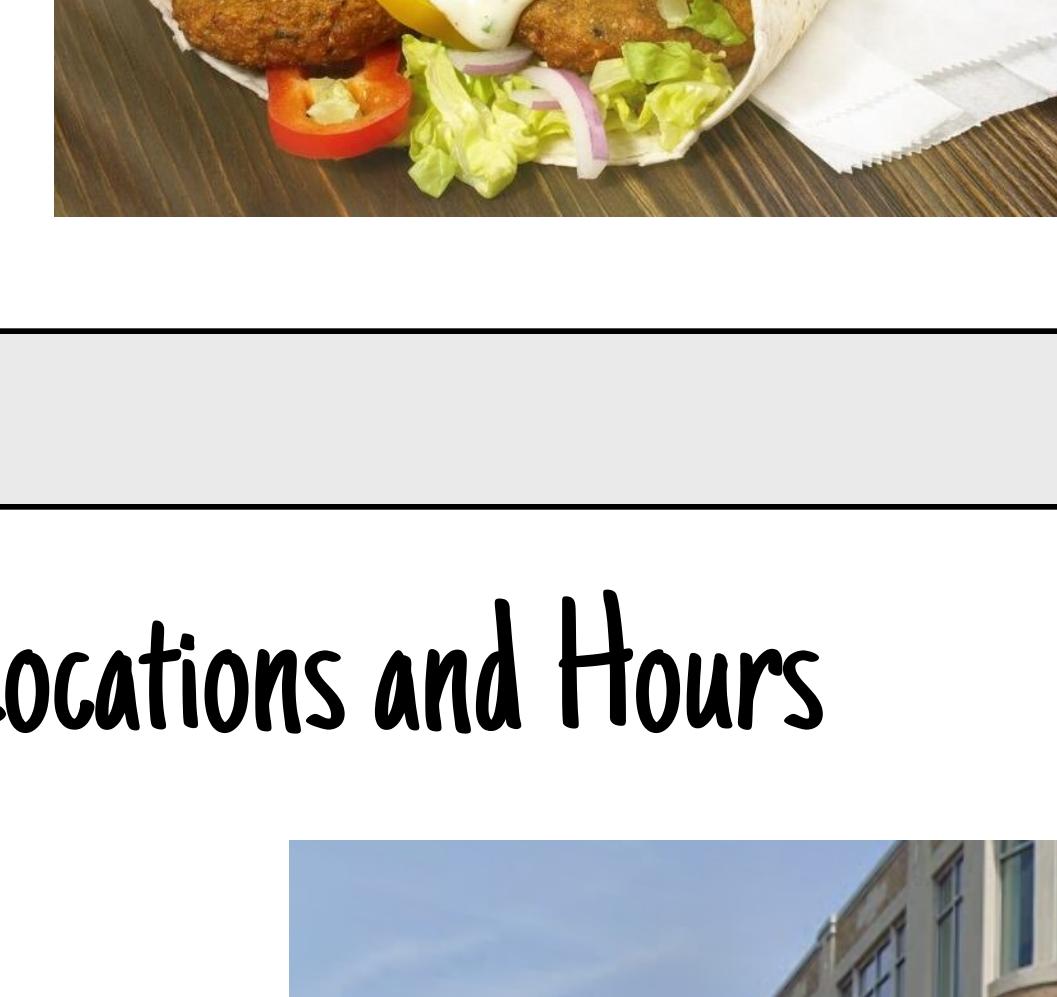

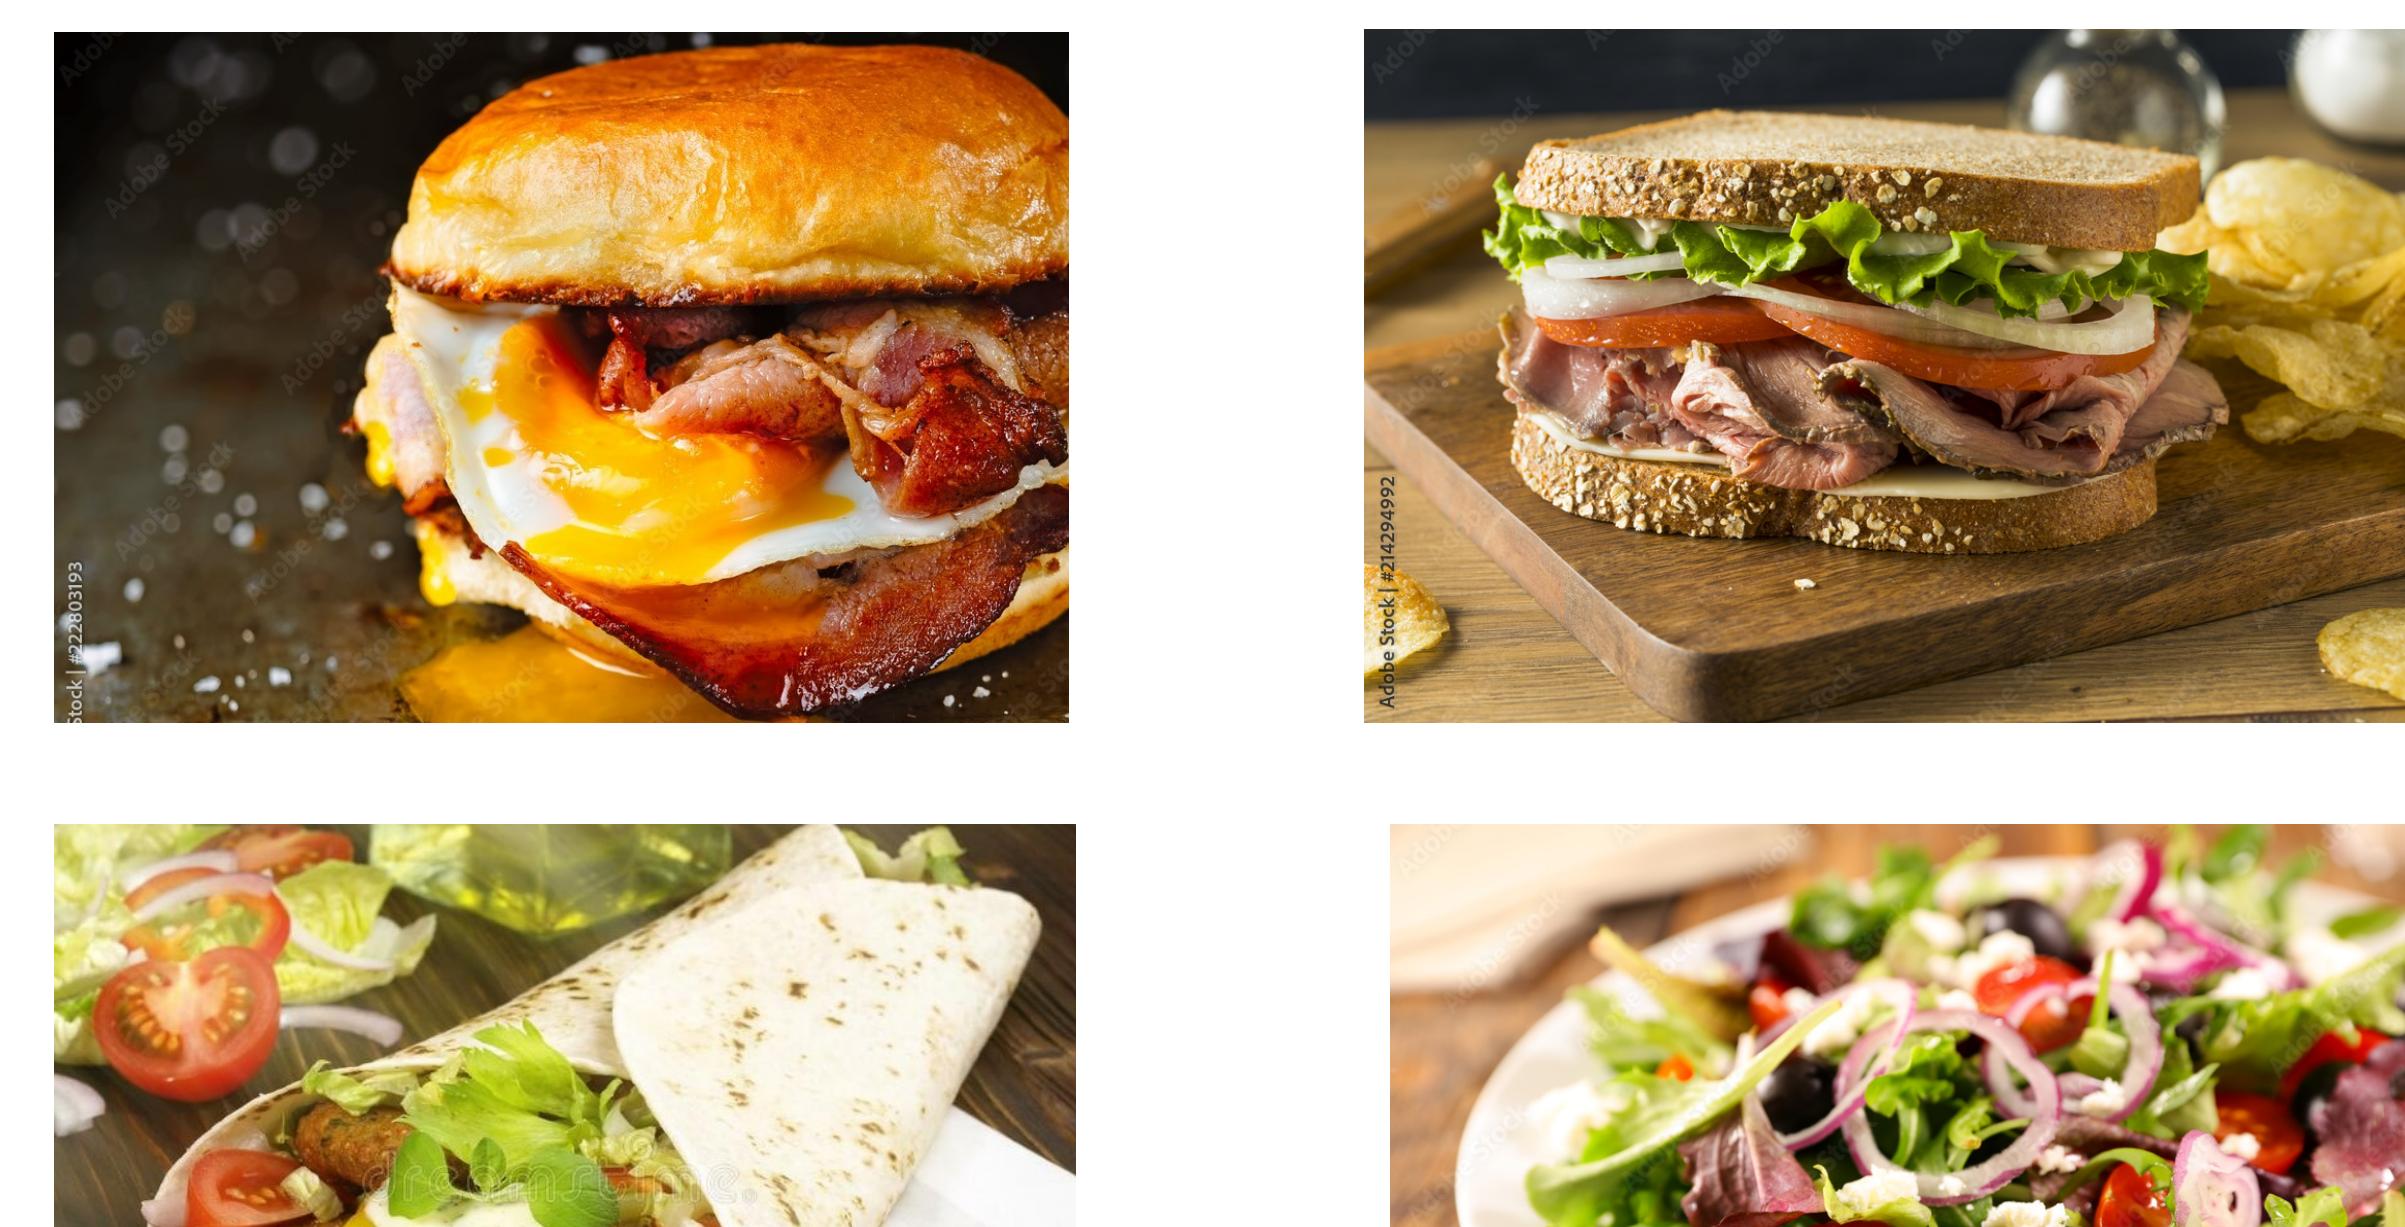

Bagel Gourmet has proudly served great food and bagels for over 25 years!

We love to see the joyful faces on our customers as they enjoy our renowned Providence style bagels!

It's the reason why we stick to the old school procedure that begins every day at 2:30am...

Our dough is made fresh daily so we never NEVER NEVER.... use bagels from a day before. It's a guarantee! :)

### Food Gallery

No major change needs to occur here. If a goal is to have images display at a reasonable size, we may want to increase the size property for these images in @media.

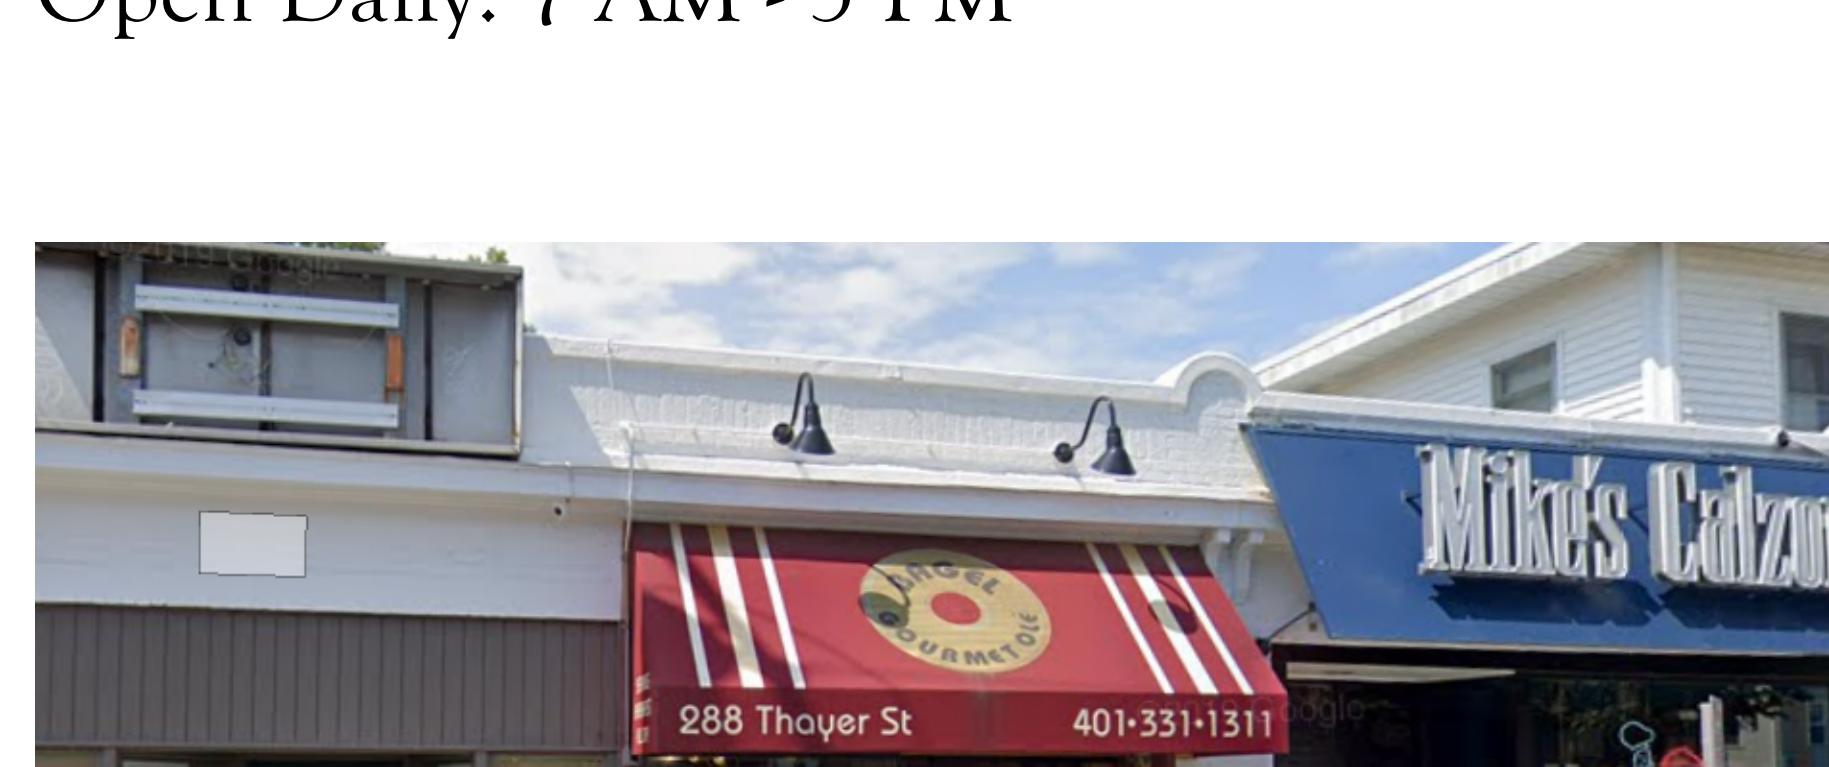

### Locations and Hours

Richmond

222 Richmond St.  
Providence, RI 02905

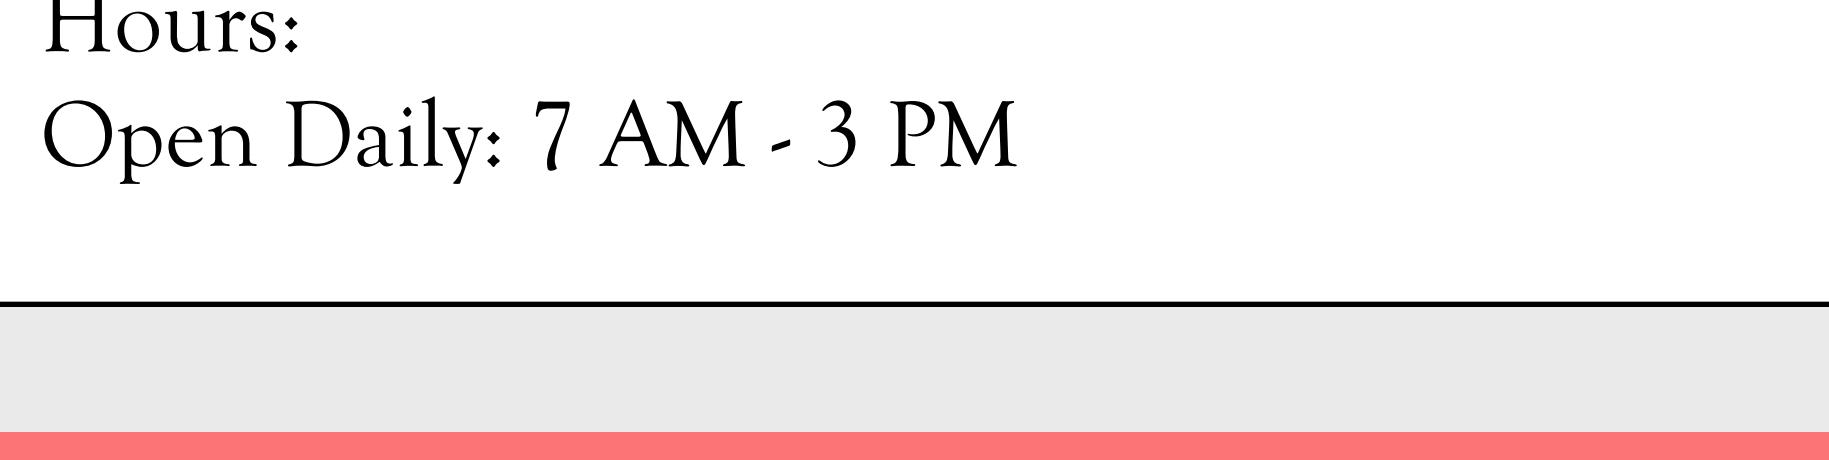

Hours:  
Monday - Friday: 7 AM - 3 PM  
Closed on Saturday and Sunday

Meeting

205 Meeting St.  
Providence, RI 02906

Hours:  
Open Daily: 7 AM - 3 PM

Thayer

288 Thayer St.  
Providence, RI 02906

Hours:  
Open Daily: 7 AM - 3 PM

As with the "welcome" box, an easy transfer from horizontal to vertical display can be done as follows:

display: grid;  
grid-template-columns: auto;

To keep consistency, it makes sense to have the images resize such that they take up as much width inside its section.

max-height: 80%  
max-width: 80%

The text will no longer fit inside this without a format error.

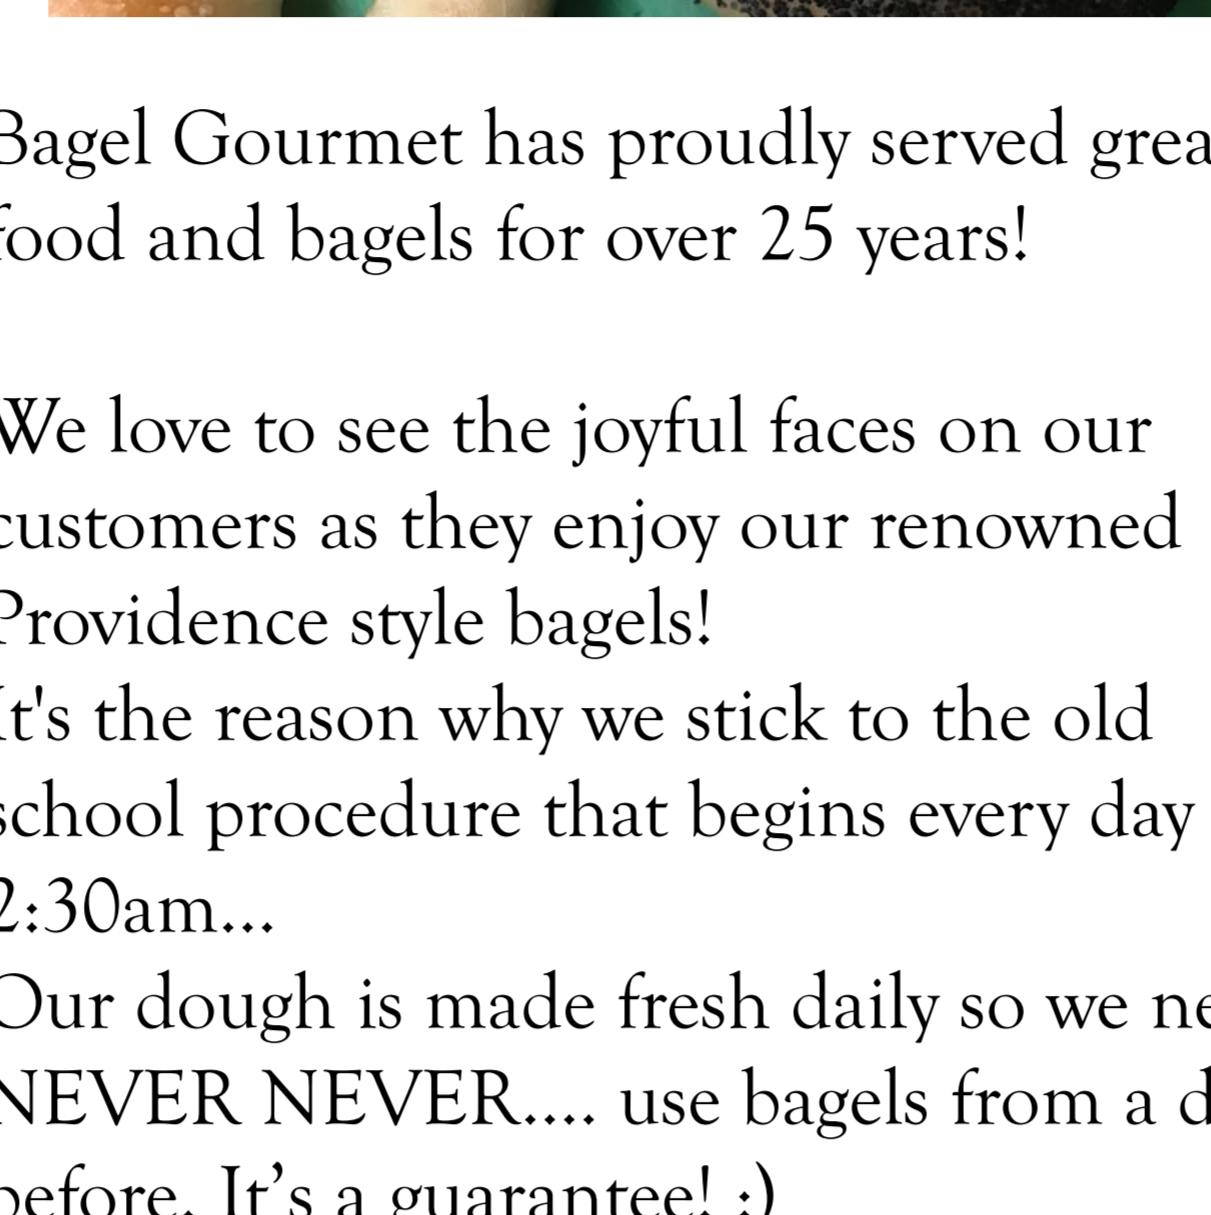

To make it disappear, use:

display: none;

All significant changes between computer and tablet displays are applicable to phone sizes. There may be cases where the phone display resembles the tablet display, depending on the actual phone model being used.

## Welcome to our cafe!

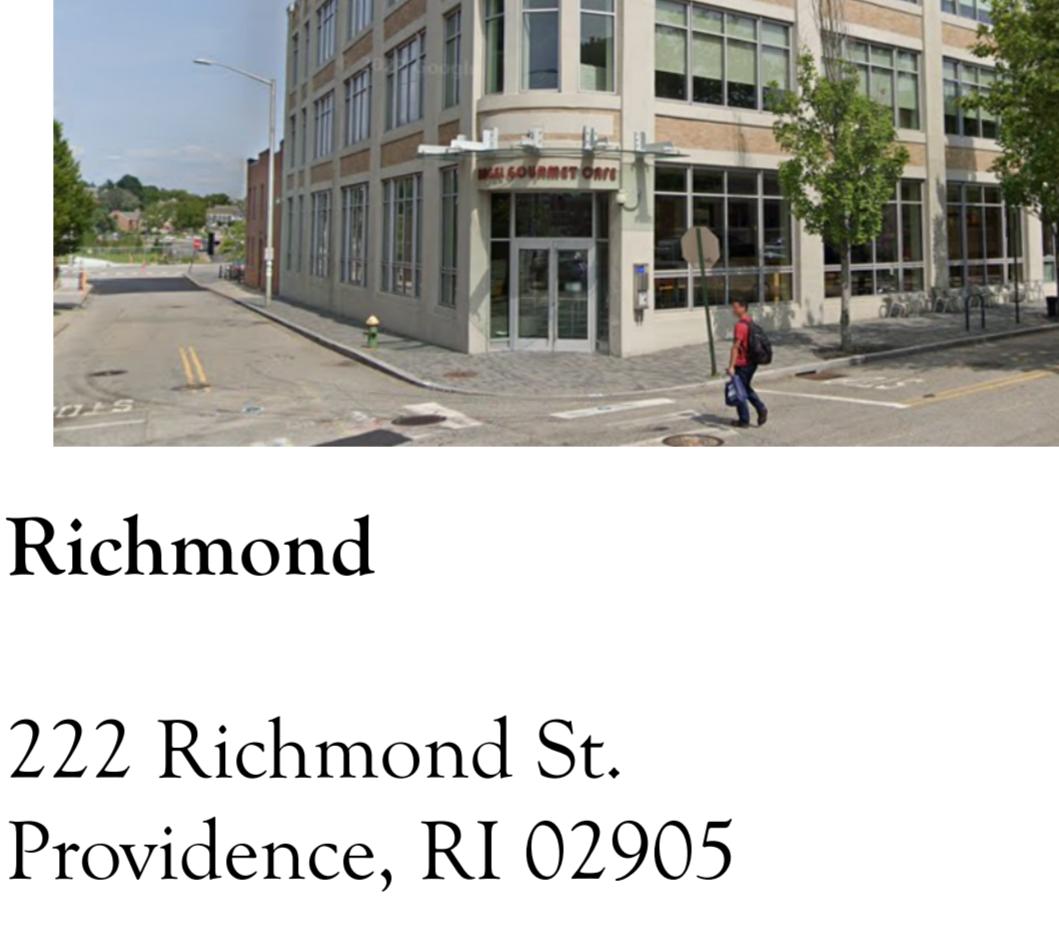

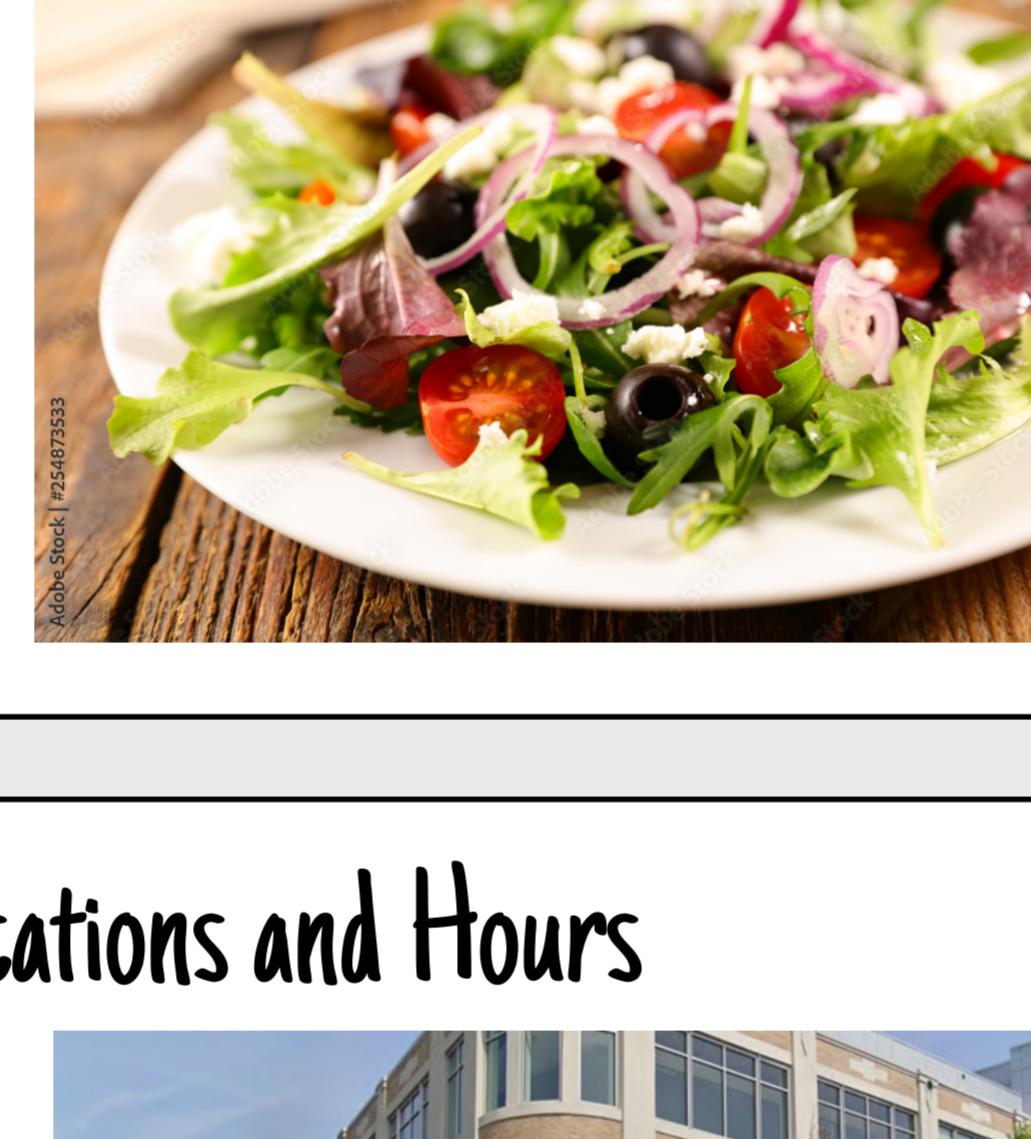

Bagel Gourmet has proudly served great food and bagels for over 25 years!

We love to see the joyful faces on our customers as they enjoy our renowned Providence style bagels!  
It's the reason why we stick to the old school procedure that begins every day at 2:30am...  
Our dough is made fresh daily so we never NEVER NEVER.... use bagels from a day before. It's a guarantee! :)

Because of the "auto" option used for the grid columns, we are able

to get this display for significantly smaller phone screens.

Here, as well as with all the images in this display, we would expect the images to resize based on the screen width. Compare these sizes with the tablet display.
